SPHERE

Scottish Pre-Hospital, Emergency and Retrieval Event Reporting

Purpose Built

- Based on principles from aviation human factors and NASA's Safety Reporting System
- Designed from the ground up as a medical significant event reporting system.

Simple

- Open responses
- Narrative reports from the submitter
- Streamlined severity scoring
- No un-necessary or irrelevant questions
- One click "Quick Report" option

Submitted in one, single web based form

Accessible

- Online system
- Available on any computer
- Compatible with mobile devices

Confidential

▸ For the patient:
- Forms submitted to secure database
- NHS server hosting

✓ Guarantees patient confidentiality

▸ For the clinician:
- Reporter's name or service do not appear on final report.

★ Encourages open and honest reporting

Education & Co-operation

- Showcasing good practice
- Helping teams find common solutions
